The machine

The ScrubWise™ C32R is a 24V ride-on cylindrical floor scrubber for indoor hard floors. Twin cylindrical brushes scrub an 860 mm path. A 1080 mm rear squeegee recovers dirty water. A spray gun on the tank is included for rinsing and local spots. It is the cylindrical counterpart to the A32R disc machine — same chassis size and tank volumes, built for textured tile, grout and other floors where a cylindrical deck is the better tool.

- 860 mm scrub path, 1080 mm squeegee.
- 24V system — four 6V / 200 Ah batteries.
- Twin cylindrical brushes.
- On-board spray gun.
- 120 L solution tank and 125 L recovery tank.
- About 6450 m²/h theoretical coverage.
- Typical run time 3–4 hours.
- Gross weight 385 kg with batteries.

ScrubWise™ C32R — rear three-quarter view.
