Specifications subject to the data plate on the delivered machine.

The machine

The ScrubWise™ S50 is a compact ride-on floor sweeper for indoor hard floors — warehouses, plants, loading docks and institutional corridors. Twin 400 mm side brooms feed debris into a 500 mm main roll brush. An 80 L hopper and 216 W vacuum hold dust and litter. A 70 L water tank supports dust control. The 48 V / 50 Ah pack is sized for a 2–3 hour shift. It sits between a walk-behind sweeper and the larger A90RC sweeper-scrubber.

- 1250 mm sweeping path with dual 400 mm side brooms.
- 500 mm main roll brush and 216 W vacuum.
- 80 L debris hopper and 70 L dust-control water tank.
- 48 V / 50 Ah battery — about 2–3 hours per charge.
- Theoretical coverage about 7500 m²/h.
- Compact footprint: 1320 × 1000 × 1300 mm.
- Headlights, warning beacon and operator seat.
- Net weight 363 kg.

ScrubWise™ S50 — front three-quarter and rear hopper view.

Principal parts · Steering column with key switch · Operator seat and diamond-plate deck · Dual 400 mm side brooms (90 W each) · 500 mm main roll brush · 80 L hopper with rear dump handle · 70 L dust-control tank · Headlights and amber beacon · 48 V battery compartment

Specifications

ScrubWise™ S50 compact ride-on floor sweeper

Description	Unit	S50
Machine type	—	Compact ride-on floor sweeper
Sweeping width	mm	1250
